

## Casio exilim EX - Z60 battery problem

Contributed by 6527mjap  
Tuesday, 10 November 2009

The battery of my camera is not charging so I did something not so familiar with it.

I have a little experrienced of fixing electronic gadgets and things. sorry if I talk like shit but theres an subtiltes I put in which you should understand. I'm not sujesting it to those who don't know how to fix but you could try it, and ofcourse, you will going to buy another one or tell to the customer support of casio exilim camera and send you a new battery pack for your camera, it will take 3-5 days before you will have a new battery, and you need the camera as well.
